**Subject:** Consultation on essential medicines list for children - Review of the 1st draft of model list for essential medicines for children  
**Follow Up Flag:** Follow up  
**Flag Status:** Red

This list requires careful review. Products are commercially available in some instances (e.g. rifampicin oral liquid) and there are some inaccuracies (e.g. some furosemide oral liquid does not require refrigeration). The WHO guidance on ARVs and FDC ARVs for children should be incorporated.
